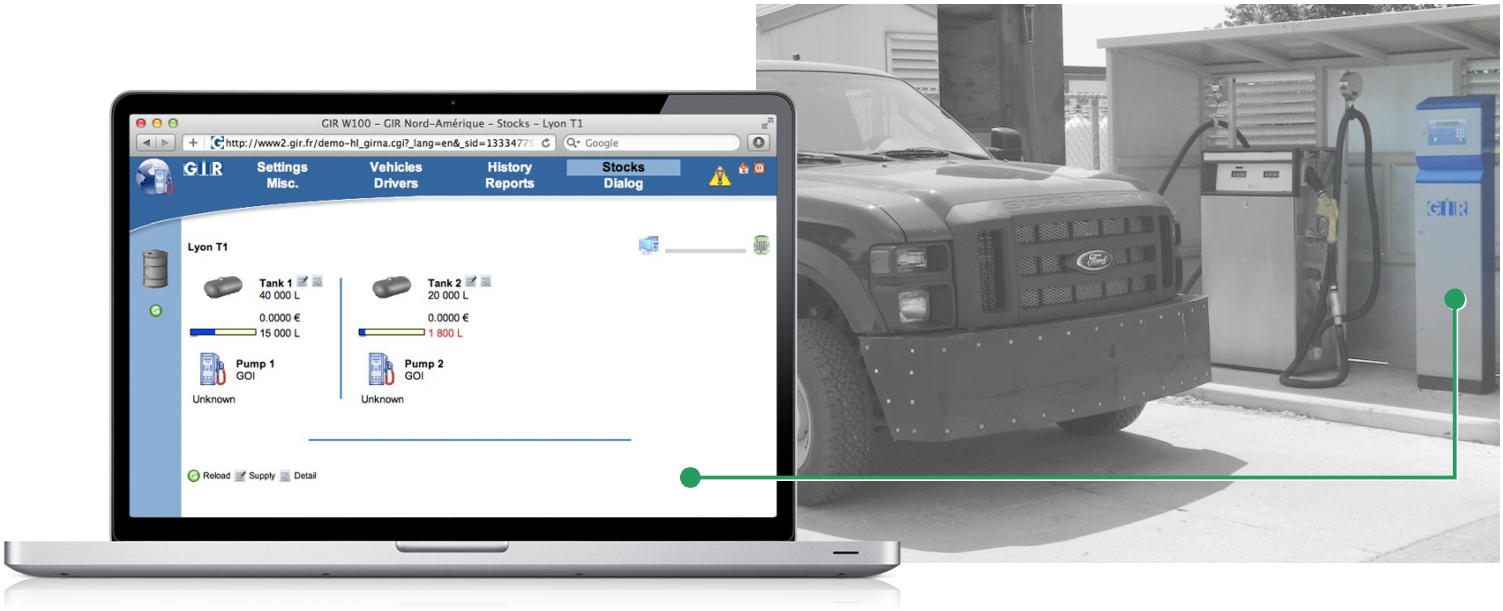
W100 software

Fuel management software for small and medium-sized fleet



Main features

- Fleet and drivers management.
- Precision delivery monitoring with transaction log.
- Reporting by driver, vehicle, product, site, ...
- Tank level monitoring (theoretical, but also live one with electronic gauges).
- Communication with terminals can be achieved through USB stick, hardwire, Ethernet, wireless, cellular, ...
- Supervision and remote control of terminals.
- Handle one or many terminals, one or many products (Unleaded, Super, Diesel, ...)

Enhanced features

- E-mail notification in case of problem. (low tank level, link failure, ...)
- Vehicles maintenance schedule (oil change, preventive maintenance, ...)
- Flexible way of working : vehicle id only, vehicle and driver, code or badge, ...
- Automated import of on-the-road refueling data.
- Door or gate access control management.

Benefits

- **Real-time communication with terminals (2500 transactions autonomy in case of link failure).**
- **Flexibility with web-based software, accessible from any point of the network.**
- **Up to 3000 vehicles and 3000 drivers.**
- **Available as web hosted software (SaaS) or classic local installation on your computer.**

Technical specifications

Software type	Full Web
Server (Windows version)	NT4, 2000, 2003, Vista, 2008, 7
Server (Linux version)	Kernel 2.2., 2.4, 2.6
Server	250 Mo HDD, 50 Mo RAM
Clients	Web browser (Firefox, MS Internet Explorer, Chrome, etc)

Compatibility

- **TIP/GCA terminal**

Product reference

- **nam_log_w100**
- **nam_asp_w100**
